Canon

Color Bubble Jet™ Printer

S600

- Four individual ink tanks with low-ink sensor
- Up to 15 ppm black/ 10 ppm color
- 2400 x 1200 dpi in color (38% greater than 2880 x 720 dpi)
- 8" x 10" photo in approx. 90 seconds on plain paper
- Advanced MicroFine Droplet Technology™ for exceptional photo-image quality

Professional Printing For Everyone.

Take your work and home projects to the next level. The S600 Color Bubble Jet Printer offers incredible speed, outstanding quality, and a host of advanced features that make this printer the perfect choice for your home or home office. Plus, it's simple to operate and quiet, so using it is a true pleasure. And because it features both USB and parallel ports, it's the ideal companion to any compatible Mac® or PC.

Speed and quality you have to experience to believe.

Get superior results at home with the S600 printer. Print everything from letters and flyers to Web pages and invitations at up to 15 ppm in black and 10 ppm in color. It even outputs full-color 8" x 10" photo prints in about 90 seconds on plain paper! And it does it all without compromising quality. At 2400 x 1200 dpi in color (38% higher than 2880 x 720 dpi), output is crisp and colors are brilliant. Plus, Canon's Advanced MicroFine Droplet Technology further refines color, precision and detail for breathtaking photo printing.

Incredibly versatile, right out of the box.

The S600 printer uses the exclusive Canon Think Tank System.™ This intelligent ink-management system features four separate ink tanks—one for each color. When one color runs out, you replace just that tank rather than the entire cartridge, helping you eliminate ink waste. The Canon Think Tank System also features a unique low-ink sensor that alerts you with an on-screen message when ink levels are low. So you can drop in a new tank before running out of ink unexpectedly in the middle of your print job.
